1. Title of the Practice: Organization of International/National

Conference/Seminars.

2. Objectives of the Practice

To develop a research culture on the campus.

To provide a platform for researchers to exhibit their research work for the best career development.

3. To give better exposure to final year students to interact with researchers at the national as well as international level

3. The Context

Organization of National and international conferences or seminars at college is a difficult task because of lack of funds and unavailability of resource persons.

4. The Practice

At the beginning of the academic year, the academic calendar is published by the Principal and IQAC coordinator through media and website. The schedule of conferences/seminars is to be mentioned in the academic calendar. The Head of respective departments is informed by a notice regarding the organization of conferences/seminars.

A respective department prepares a plan for conference/seminars and organizes the conference/seminars by conducting meetings. Respective departments advertise the flyers of conferences/seminars amongst researchers. In conferences/seminars, a number of interactive sessions are organized, and fruitful discussions are made.

5. Evidence of Success made.

Due to the organization of national/international conferences/seminars, a research culture is developed in the faculty some faculty members are participating in such events and publish their work as oral or poster presentations. During discussion sessions, final-year students participate in interactions with resource persons, so they have self confident to achieve something.

6. Problems Encountered and Resources Required Problems: Some researchers expect offline mode for the conduction of this activity. Most students are not aware of importance of conferences and seminars.

7. Resources required: A well-equipped audio-video system is an essential requirement. A good quality resource person should spend some time delivering lectures. Participants should have sufficient internet facilities, good mobile or Laptops, etc.

8. Notes (Optional): Depending on the expectations of the participants, it is possible to organize the event through a hybrid mode.
