

Vidnyan Mahavidyalaya Sangola
Annual Report
Management Information System 2021-22

I am immensely happy to submit annual report on Management Information System 2021-22. Our committee on Management Information System started doing work on MIS from year 2018-19. Last year 2019-20 MIS launched its first module as online admission module. We get huge, excellent and fruitful response from students taking online admission. Due to pandemic situation (COVID-19) it was made compulsory by university and government of Maharashtra to give only online admission. But fact is that MIS committee is ready to face this typical situation because committee is started working on MIS since-2018-19 and taking this as challenge and making gold of opportunity, MIS committee launched first module. As MIS has launched its first module as online admission module , 1734 students from all programs such as Science, Arts, BCA, B Sc (ECS), M.A., M.Sc. were successfully registered through this module which it runs successfully in academic year 2021-22, without any single completion. Due to successful launching of first module, committee will get confidence to develop remaining modules such as Admin Module, Management module, Principal module, HOD module, followed by Faculty

module, Learning Management Module (LMS), Clerk module, Finance module, and student module. Till date MIS has given access to Admin module(One Faculty), Clerk module (TWO clerk), Finance module (One clerk), HOD module (Twelve HODs), Faculty module.

Now from the year 2021-22 MIS committee is decided to develop Library automation by open source software named as E-Granthalaya, up till four thousand books were enrolled on this software. This module works as total issue and return of books, it includes book bank scheme, enrolment of journals, Library Budget, Issue the identity cards, Bar coding prints, stock verification, OPAC, member registration. By taking students as centre and core part of the education MIS committee is decided to give full access to learning management module to students through all nineteen departments and all faculty members.

A Management information system/campus information system has a great opportunity to:

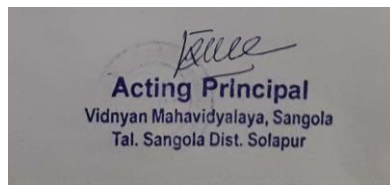

- to share academic progress and growth based on classroom observations, testing data, assessments, portfolios, and assignments
- it helps to learn from parents or guardians so one can be better informed about students' strengths, needs, behaviors, and learning styles
- it helps to discuss enrichment or intervention strategies to support students' learning
- it also helps to discuss issues that may be interfering with students' learning and growth

Till date MIS committee has made every possible effort to make this digital platform of management information system better and comfortable.

In addition to this MIS committee in Collaboration with ISSTUR Technologies Pune, has arranged One day workshop on STSSPM teaching and learning application, which includes teaching and learning method is that, this workshop can boost student involvement in our classroom and help to promote positive outcomes for students, parents faculties and college management. The Basics of this workshops are usually to create awareness about the gratefulness and usefulness of the MIS in learning process of the student, keeping in view that the student is central and core part the education. While the main focus of this workshop should be learning, it is also important to discuss factors that can affect learning process during this pandemic situation, such as students' behavioral and social development. This MIS will generates 182 different types of reports, like enrollment list of students from all faculties, Category wise list of students, detailed fee report of the students, assignments, tests, Absent-present report of students,..... all types of feedback reports conducted by the department, Result

analysis of the students,.... quiz, bridge course conducted by the department. It will helps in developing the learning management system, all faculty members were upload PPTs of all chapters class wise on their own MIS account and also video recording of all the articles. Once you upload syllabus, assignment, test, quiz, video recording of articles, and PPTs it will become quite easily accessible to all students enrolled in your class. Faculty members can interact with students and vice versa.

Like this student can take online admission from anywhere and can pay fees online by the help of Credit cards, debit cards or by RTGS. Shortly we will develop our own APP on this whole MIS. The main goal of this MIS is to give better exposre to all students, principal, all HODs, faculty members and clerical staff in view of management.

A handwritten signature in blue ink, appearing to read "Shankar Dhasade".

Exam Form Generation

Generation of examination forms

- The generation of examination forms can be done with respect to the schedule defined for the given course part/term.
- The forms will be generated based on the admission data for the fresh students and result data for repeater students.

Suggestions:

- The examination forms for repeaters shall be generated once the modifications and corrections are over in result. (Currently for repeaters, exam forms are generated from back end, it shall have appropriate interface for summer 2010 events)
- Generation of examination forms is a server resource consuming process. Preferably, the exam forms generation process should be carried out off the office hours – Early morning or late evening so that the internet traffic on the server is low & the server can allocate the resources to the process properly.
- Please check the correctness of the examination forms for all (each and every) details against the admission/result data for at least one college. The random samples can be checked for other colleges also.
